

Introduces

FORTRESS *Power* eFlex

Flexible Install

The new lightweight unit can be wall mounted!

The eFlex also comes with racks that can be used to stack multiple units on the floor.

It is brilliantly designed to fit into standard 24-inch computer racks!

Scalable & Versatile Application

The new eFlex battery is scalable up to 200 kWh per inverter via CAN communication cables, to support Residential, Commercial and Industrial Storage Projects.

Fortress **eFlex 5.4** Lithium Iron Phosphate (LFP; LifePO4) battery can be easily integrated into a new or existing PV system to support back-up, Off-Grid, Self-supply, Time-of-Use or Demand Curtailment applications.

Thanks to the exceptional life span of an LFP battery, you will connect to the lowest energy costs available!

If you want to find out how to calculate the energy cost of your battery bank, please check out our previous Blog:
