

Application Engineer
Fortress Power, LLC
Southampton, PA 18966

Required: Minimum of three years' work experience

Are you a high energy and hands-on engineer? Do you have a passion to bring advanced lithium batteries to millions of homes and businesses around the world? Then we are ready for YOU!

As an Application Engineer, your typical day may include:

- Respond to all technical support inquiries from clients (solar contractors and distributors) through multiple channels: phone calls, email, etc.
- Design energy storage systems for existing or new residential and commercial solar PV systems, including selecting proper battery-based inverter and battery bank size.
- Perform test on new products with various battery-based inverters available on the markets.
- Develop installation manuals and integration guides.
- Support Product Manager on new product development and improvement.
- Assist Sales Representatives with Technical Applications and product recommendations
- Host product training for clients and sales representatives

Do you have the following qualifications?

- Bachelor's degree (B. S.) from four-year College or university
- A minimum of 2 years' experience in electric engineering field.
- AutoCAD drawing skill
- Attention to details and strong documentation skill.
- Ability to thrive in a fast-paced, complex, rapid growth environment and a goal focused, self-starter who can work independently.
- Residency in Southampton, PA area
- Solar background is a plus

If so, please contact us at andria@fortresspower.com

BENEFITS

A salary package consisting of base salary, commission, 2 weeks-vacation and other incentives.
