

ConnectedSolutions Program for Fortress Power

Join the ConnectedSolutions program
and get paid to keep the grid more stable

**Eversource, National Grid or Cape
Light Compact** program customer,
can now enroll their Fortress Power
battery paired with a Sol-Ark inverter
in ConnectedSolutions!

This offer with ConnectedSolutions uses
your Sol-Ark & Fortress Power battery to
make the grid more sustainable, reducing
peak energy use which reduces air pollution
and lowers the cost of electricity.

CREATE CLEAN ENERGY

Contribute to a greener power grid
by sharing your energy & offsetting
peak demand

SECURE YOUR ENERGY

Experience energy independence
and keep the lights on even when
the grid goes down

EARN CASH REWARDS

Make the most of your Fortress
Power investment & earn money
paid to you by your utilities

GET PAID FOR BATTERY STORAGE

Earn up to \$1,375 per year with your eVault Max solution!

HOW IT WORKS

STANDARD USAGE

Your home will use energy from your PV and complement it from the battery and/or the grid.

PEAK DEMAND EVENT

Your battery will discharge at the maximum supported power. If your home needs more than
the available power from the sun and the battery, you can still use the grid. The battery will
recharge from your PV after the event ends.

SUMMER SEASON (JUNE 1 - SEPTEMBER 30)

	National Grid	Eversource	Cape Light Compact
Massachusetts	\$275/kW	\$225/kW	\$275/kW
Connecticut	n/a	\$225/kW	n/a
Rhode Island	\$400/kW	n/a	n/a

WINTER SEASON (DECEMBER 1 - MARCH 31)

	National Grid	Eversource	Cape Light Compact
Massachusetts	\$50kW	\$50/kW	\$50/kw
Connecticut	n/a	\$50/kW	n/a
Rhode Island	n/a	n/a	n/a

FREQUENTLY ASKED QUESTIONS

How does ConnectedSolutions work?

ConnectedSolutions is a program that reduces overall electric use during periods of high energy demand using connected devices such as Fortress Power batteries. Fortress Power is working with Mass Save to bring hundreds of batteries together to create a virtual power plant to support the grid in a clean way.

How do I apply and enroll?

In most cases, your battery installer or vendor will submit the application for you. You can send us a request to enroll using the link below and we will contact your installer or vendor to let them know of your interest in ConnectedSolutions.

Am I eligible?

You are eligible if you own any Fortress Power system integrated with a Sol-Ark inverter and are a resident of Massachusetts, Rhode Island or Connecticut in Eversource, National Grid or Cape Light Compact territory

What will I earn?

Earnings are based on actual performance. After each season, your electric utility will pay out the incentive based on the measured performance of your Sol-Ark with Fortress Power battery. You will not receive credit for peak demand events prior to enrollment, or if your battery cannot participate in an event for reasons such as an empty battery or not having internet access.
