Fortress Power eForce Stackable 9.6kWh Battery for Home Solar Storage

Product Description

The eForce 9.6 kWh Stackable Battery is Fortress Power's advanced solution for whole-home backup, off-grid living, or solar self-consumption. With over 8,000 cycles and a 20-year design life, you can stack modules vertically (up to 3 modules) or expand laterally up to 153 kWh to fit your home's energy needs. The built-in eWay wireway, with busbars, conduit ports, emergency shutoff, and LED indicators, keeps your installation safe, organized, and professional. Pair it with the Envy Inverter (sold separately) to form a weather-resistant (IP65) energy tower with seamless AC/DC integration. Fully compatible with Fortress Power's mobile app, eForce makes it easy to expand, monitor, and manage your energy system, all backed by an industry-leading warranty for peace of mind.

SEO Friendly Description (150-160 characters)/Meta Description

Premium eForce 48V LFP battery with built-in heater. Stackable 9.6–28.8kWh for reliable home solar energy storage and whole-home backup.

Product Key Features + Benefits

Extended Warranty Coverage – Backed by a standard 15-year industry-leading warranty, with an optional 30-year extension available — offering unmatched long-term value and peace of mind.

Lower System Costs, Fewer Components – eWay integrates busbars, conduit ports, and an emergency shutoff into one hub, reducing components and installation time. The Envy Inverter mounts directly to the eWay, forming a streamlined, weather-resistant (IP65) energy tower.

Modular, Cable-Free Design – Engineered for flexibility, eForce modules can be stacked vertically (up to 3 modules) using wireless quick-connect plugs — no cables required — or expanded laterally for systems up to 268.8 kWh.

Built-In Heater & All-Weather Protection – Maintains optimal battery performance in cold climates. With IP65 rating, eForce operates safely and reliably indoors or outdoors, year-round.

Sleek and Code-Compliant Installation – Modular, stackable design with quick-plug technology allows for fast and simple setup, while providing a clean, professional installation that meets NEC and NFPA standards, designed to suit modern homes with elegance.

Flexible and Scalable Energy for Growing Needs – Easily expand your system vertically or laterally to match your growing energy needs.

Earning Money Through Grid Participation – Take part in Virtue Power Plant programs to earn revenue and support grid reliability with intelligent energy discharge.

Applications

- Whole-Home backup power
- Off-grid homes and cabins
- Light commercial energy systems
- DIY solar setups
